## CAREER OBJECTIVE **C**

Hello! I'm junior developer. Dedicated backend developer with a strong understanding of software development principles and best practices. Proficient in Python, with experience in developing web applications. Strong problem solving and analytical skills. Seeking an entry level position to contribute to a team of experienced developers.

## EXPERIENCE **E**

### Website Development
Dulma Kitchen / Andijan / 10 2022 - 12 2022

We Have Created A Website For The DULMA Kitchen Which Situated In Andijon City. In This Project, I Worked With Two Coders. Project Codes Are Written In Python, Exactly Django. I Have Experienced From The Work Working With Users, Storage Data From Database And E.T ... This Website Is Intended For Customers To Place Orders Online

### Telegram Bot Creator
Dulma Kitchen / Andijan / 12 2022 - 01 2023

In My Country, Using Telegram App Is Common. After We Created A Website For The Kitchen, The Kitchen Boss Asked Us To Create A Telegram Bot For His Products . We Created A Telegram Bot Using Python Aiogram. The Bot Also Is Intended For

Customers To Place Orders Online. I Have Gained Some Knowledge About Creating Telegram Bots From This Project

## EDUCATION E

### CGPA : A(78) - English Language And Literature

Andijan State University / Andijan / 2019 - 2023

My Bachelor's Degree Is Foreign Language And Literature. I Have Been Studying Here For Four Years But I Am Interested In Computer Science And Programming Languages For This Reason I Decided To Learn Computer Science And Took One Year Courses

### CGPA: A(81) - Computer Science And Programming Language

Digital City Academy / Andijan / 2021 - 2022

Here I Have Taken Some Courses About Computer Science And Programming Language. During More One Year, I Have Learned Python And Its Framework Django, Working With Rest APIs, Storing Data From Database And E.T..
